

MUSIC[®] Pro

Inspiration.
The Melody of
the Human Voice.

Siemens Hearing Instruments
Better hearing is better living.

SIEMENS

MUSIC Pro is at the head of its class for good reason. State-of-the-art technology. A variety of special features. A world of better hearing.

Improved Hearing. One Voice at a Time.

More. Possibilities.

Micro-CIC™ (Completely-in-the-Canal) and beautifully designed BTE (Behind-the-Ear) hearing instruments.

Research has shown that directional microphone technology can improve speech understanding in noisy environments, which can result in improved hearing satisfaction.

Select MUSIC Pro models can be equipped with a directional microphone system. This system allows you to select whether MUSIC Pro picks up sounds from all directions, or focuses primarily on the sounds in front of you. Although MUSIC Pro was designed to automatically respond to ever-changing listening environments, your

MUSIC Pro is the only hearing instrument in its class to offer an advanced Voice Activity Detection System (VAD). This digital sound-processing system monitors for speech sounds, automatically reducing the level of some background sounds. The advanced digital sound processing of MUSIC Pro also automatically amplifies quiet sounds so they can be better heard, while helping to limit loud sounds that may otherwise be uncomfortable. MUSIC Pro lets you enjoy the experience of selective digital sound processing for the world of sound around you.

Whether you have mild or a more severe hearing loss, personal taste and preference is a matter of choice. MUSIC Pro offers a complete family of styles for you to consider, including the inconspicuous-when-worn

Hearing Care Professional can deliver up to three optional listening programs that let you have added control over what you hear with the touch of a button.

You and your Hearing Care Professional will decide if you will better benefit from the freedom of automatic volume adjustment or manual control. The optional volume control (on select models) lets you decide which

More. Freedom.

volume is best for you in any given situation. Or if you choose, enjoy MUSIC Pro's fully automatic operation – the choice is yours.

In addition, MUSIC Pro offers the convenience of soft alerting tones to inform you when switching between the optional listening programs and when it's time to change the battery.

MUSIC Pro also incorporates an advanced "power-on delay" feature. MUSIC Pro delays the sound when first turned on, so that you may insert the hearing instrument in the ear without unpleasant feedback (whistling). This is a special feature that is set by your Hearing Care Professional.

MUSIC. To Your Ears.

With MUSIC Pro's advanced, computer-assisted programming technology, your Hearing Care Professional will fit MUSIC Pro to your individual hearing loss with improved precision and expertise – a difference you're sure to hear.

MUSIC Pro offers the expanded flexibility your Hearing Care Professional demands in order to cover a wider range of performance that better meets your needs.

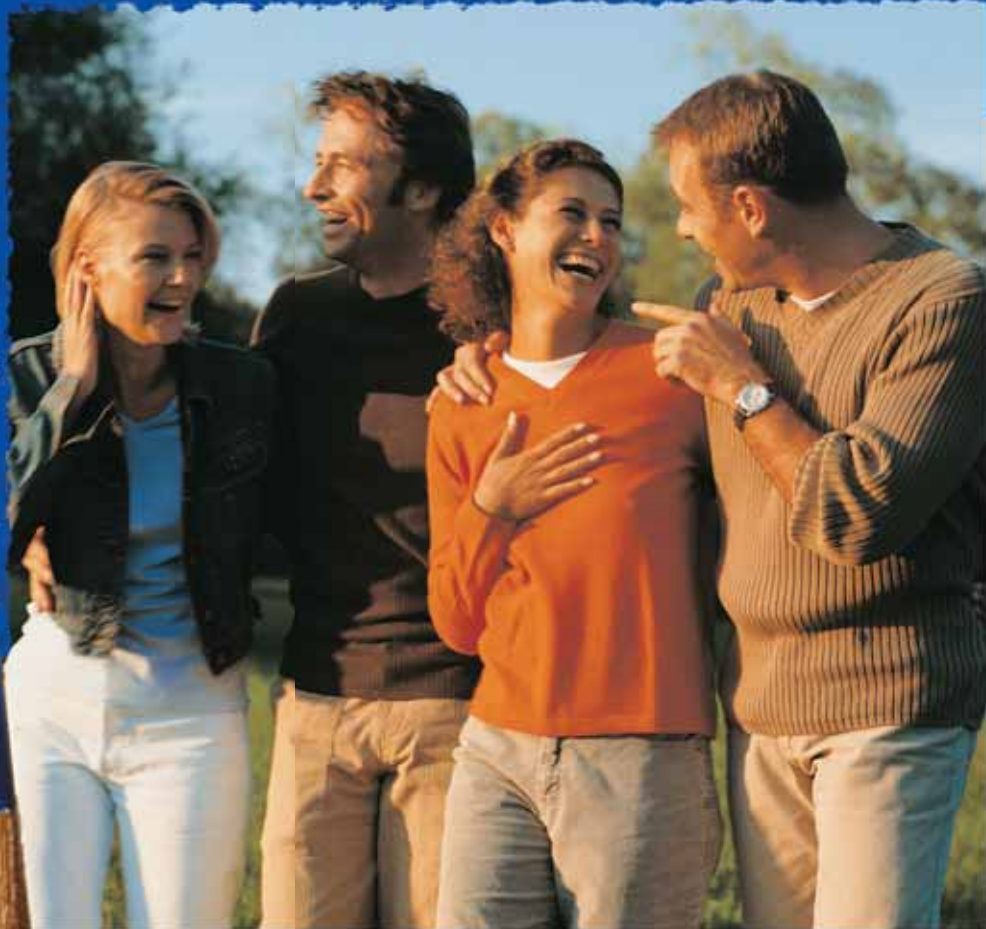

MUSIC Pro

Sounds of life are all around. Each helps us communicate, share our emotions and live in our dynamic world.

A World. Of Better Hearing.

For 125 years, Siemens Hearing Instruments has dedicated itself to designing and building the finest hearing instruments in the world, so people with hearing loss can enjoy the world with better hearing and better living. Now Siemens presents the new MUSIC® Pro family of digital hearing instruments – inspired by the melody of the human voice.

MUSIC Pro

The Digital Spotlight:

MUSIC Pro

- ✓ A comprehensive family of digital hearing solutions for a wide range of hearing loss, including our latest MUSIC Pro S Micro-BTE.
- ✓ Every MUSIC Pro hearing instrument features our exclusive Voice Activity Detection System (VAD) to help reduce many background noises.
- ✓ Optional, value-added features are available including a Directional Microphone System, convenient alerting signals and power-on delay.
- ✓ MUSIC Pro provides world-class digital performance – affordably.

Hearing instruments help many people hear better, but no hearing instrument can solve every problem or restore hearing back to normal.
